Typography 3
You will design UI of a new mobile weather app. Create typographic hierarchy with the following set of rules:

• Use Comic Sans, Georgia, and Helvetica as typefaces
• Use scale
• Use **weight**
• You may use rotation of text
• Background is white and figure is black
• No gray scale (only black or white)
• No images/photos/illustrations
• No italics
• Screen size is 750 × 1334px
• Use all the copy below:

February 23, 2015  
Berkeley, CA 94720  
Monday Clear  
Precipitation: 0%  
Humidity: 62%  
Wind: 7mph  
68°F  
Tuesday 64  
Wednesday 64  
Thursday 66  
Friday 66
Version 1

Typographic Hierarchy

Version 1 should focus on typographic hierarchy (i.e., help a user understand information through a logical and meaningful journey).

Describe your design in this text box space.

In this design, I used scale to emphasize the current day’s temperature the most, followed by the name of the current day, location, and cloud cover information. Weight was used to draw the eye to the current date, location city and state, and current day additional conditions labels.

I used the Comic Sans typeface for all day names and location information, Helvetica for temperature numbers, and Georgia for other supplemental information about the day.
Version 2 in contrast, should play with possible emotional aspects of interaction with a weather app (e.g., funny, nostalgic, angry, etc.). You are free to interpret the possible emotional aspects. However, the same rules apply to this version. You should use the same emotion you used for Type 1.

What is your emotion? Describe your design in this text box space.

I wanted to give this design a whimsical feeling that emphasizes the current cloud cover, which is perhaps a weather element more tied to emotion than temperature for most people. Additionally, the days of the week and their forecasted temperatures are arranged in a shape that is reminiscent of sun rays and implies a circular scrolling functionality.
