Version 1

Typographic Hierarchy

Version 1 should focus on typographic hierarchy (i.e., help a user understand information through a logical and meaningful journey).

Describe your design in this text box space.
Version 2 in contrast, should play with possible emotional aspects of interaction with a weather app (e.g., funny, nostalgic, angry, etc.). You are free to interpret the possible emotional aspects. However, the same rules apply to this version. You should use the same emotion you used for Type 1.

What is your emotion? Describe your design in this text box space.
