

# DETOUR

---

*Kay Ashaolu | Carinne Johnson | Ryan McAdam | Suhani Mehta*

## **Summary**

We created our final prototype in Axure, viewable here:

[http://people.ischool.berkeley.edu/~suhani/final\\_prototype/start.html](http://people.ischool.berkeley.edu/~suhani/final_prototype/start.html)

There are sound files associated with certain screens, but they may not work on the phone since they would need to be downloaded. We recommend users try our prototype on their mobile phones as well as on a computer to get the whole effect. See the app map below for step-by-step directions through the prototype.

In addition, though they are not part of our functional prototype, we also started reworking the design and user interface in the attached static screens.

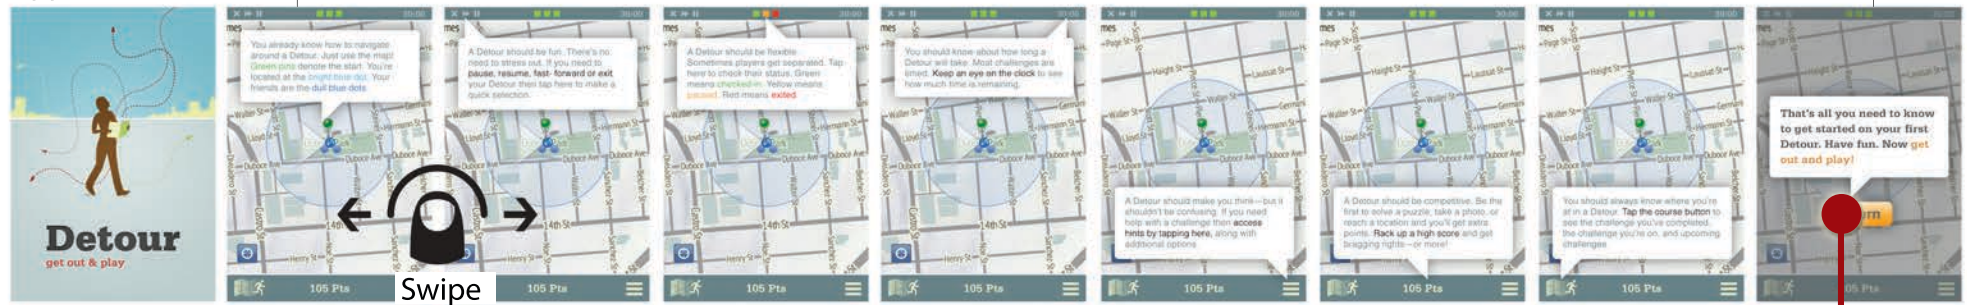

Thank you for your review and feedback.

**Now, get out and play!**

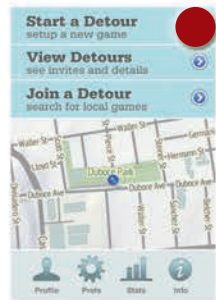

—The Detour Team

# Tutorial (first time you start app)

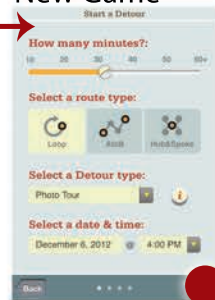

## App Start Screen

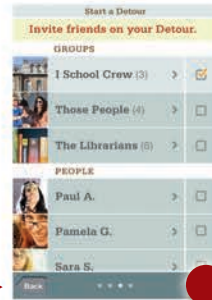

## Home Screen

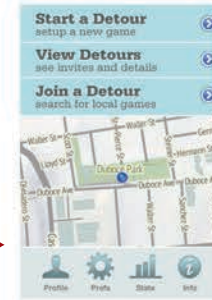

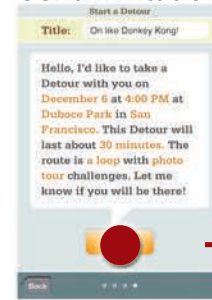

## Set Up a New Game

## Invite Friends

## Send Invitation

## Navigation

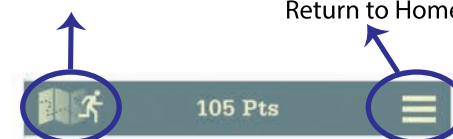

- X = Exit game
- >> = Skip to next challenge
- || = Pause game

Player is checked in  
Player is paused  
Player has exited

View map of  
current location or  
course overview

Menu:  
Get Hints  
View Tutorial  
Return to Home Screen

## Legend

- = Hot Spot (click here)
- → Main Path
- → Alternative Options

## Play a Scheduled Game

## Select Game

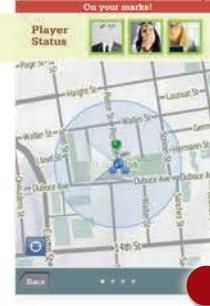

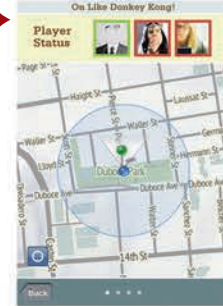

## Check In

(waiting for all players to check in)

organizer can go back and manually delete a player if they drop out

On Your Mark!  
(when all players have checked in...)

Get Set!  
(read the rules)

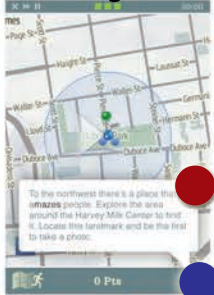

Go!

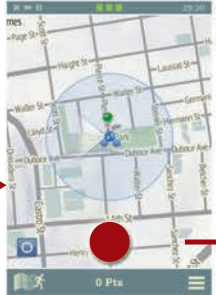

automatically transitions to first challenge clue

## Challenge #1
